Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/27/2007 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Walsh (USPN 6,776,300) in view of Voorhees (USPN 3,498,494).

Walsh discloses the invention substantially as claimed. With respect to claim 2 Walsh shows a bottom, long-side walls (below 120) hinged (30) to corresponding long-side bank portions of the bottom, and short-side walls (below 122) hinged to corresponding short-side bank portions of the bottom, wherein said long-side walls are configured to be longer than said short-side walls, said long-side bank portions are configured to be higher than said short-side bank portions (clearly shown fig. 1), a back surface of the bottom of the large folding container is formed with a bottom fitting portion

Art Unit: 3781

(fig. 7 including 92,112,118,100,108,88), and said bottom fitting portion is divided into sub-fitting portions by a groove (any of the many grooves in the bottom meet claimed groove) extending parallel with said short-side bank portions, protruding portions (92), said protruding portions are fitted into respective fitting concave portions (184) formed when stacked on one another. However Walsh does not disclose the stacking arrangement of one large container stacked below two smaller containers with the same shape and structural features.

Voorhees teaches a stacking arrangement of one large container stacked below two smaller containers with the same shape and structural features (fig. 14) in the same field of endeavor for the purpose of holding different objects.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have containers with the same structure but different sizes but also stackable as taught by Voorhees in order to add versatility to a storage system.

Response to Arguments

3. Applicant's arguments with respect to claim 2 have been considered but are moot in view of the new ground(s) of rejection.
